#	Section	Subsection
1	ABSTRACT	
1.1	Abstract	Full Abstract
2	INTRODUCTION	
2.1	Introduction	Project Background
2.2	Introduction	Project Requirements
2.3	Introduction	Team Structure
2.4	Introduction	Report Outline
3	METHODOLOGY	
3.1	Methodology	Methodology Outline
3.2	Methodology	3D Model Creation
3.3	Methodology	3D Controller Design (Turning, Kicking, Recovery, PID)
3.4	Methodology	3D Controller Design (Walking)
3.5	Methodology	3D Controller Integration
3.6	Methodology	3D Controller Testing
3.7	Methodology	3D Controller Benchmarking

3.8	Methodology	2D Simulation Platform
3.9	Methodology	Behavioral Model Creation
3.10	Methodology	Behavioral Testing
3.11	Methodology	Behavioral Performance Metrics

4 RESULTS AND ANALYSIS

4.1	Results and Analysis	3D Controller Results
4.2	Results and Analysis	Behavioral Parameter Optimisation Results
4.3	Results and Analysis	Behavioral Tactical Optimisation Results

5 TEAM PERFORMANCE ANALYSIS

5.1	Team Performance Analysis	Team Organisation Tools
5.2	Team Performance Analysis	Team Performance Metrics

6 CONCLUSIONS AND FURTHER WORK

6.1	Conclusions and Further Work	Conclusions
6.2	Conclusions and Further Work	Further Work

SUMMARY

REPORT WRITING ASSIGNMENT TRACKER

Ownership, suggested length and status for each report section

Description	Author(s)
Brief summary covering objectives, methodology, key results and conclusions	Wang Zefu
Context and motivation for the project	Wang Jinghao
Outline of requirements in your own words	Wang Jinghao
Overview of team organisation and member roles	Wang Jinghao
Brief description of the structure of this report	Wang Jinghao
Overview of the overall methodology and approach taken	Ciaran Breen
Description of the 3D modelling approach and tools used	Jie Shu
Design decisions and implementation of turning, kicking, recovery and PID controllers	Jie Shu
Design decisions and implementation of the walking controller	Ciaran Breen
Integration of all 3D controller components	Jie Shu
Testing procedures and criteria for the 3D controller	Ciaran Breen
Benchmarking methodology and simulation efficiency analysis	Ciaran Breen

Description of the 2D simulation platform setup and configuration	Wang Zefu
Design and implementation of the behavioral model	Chengjie Hao
Testing procedures and criteria for the behavioral model	Chengjie Hao
Definition and rationale for behavioral performance metrics	Chengjie Hao

Results and analysis from all 3D controller components	Jie Shu
Results and analysis of behavioral parameter optimisation	Bonolo Masima
Results and analysis of behavioral tactical optimisation	Bonolo Masima

Overview and evaluation of tools used for team organisation	Ciaran Breen
Analysis of team performance against estimated and actual metrics	Ciaran Breen

Key findings from methodology and results; overall project outcome assessment	Wang Zefu
Possible areas of improvement and future development	Wang Zefu
